

Dr. Dmitry **Ryumin**

AI Expert

Senior researcher of the Speech and Multimodal Interfaces Lab, SPC RAS
Associate Professor at the School of Computer Science, Physics and Technology, HSE University
neweraairesearch@gmail.com | dmitryryumin.github.io | DmitryRyumin | Dr. Dmitry Ryumin

"Innovate today, or become obsolete tomorrow."

Summary

Dr. Dmitry Ryumin is a scientific researcher and AI expert, with a portfolio of publications in high-impact Q1 journals and top-tier A* conference proceedings. He is an active reviewer for leading international journals and conferences. His research interests cover a wide range of areas, including speech technology, audio-visual speech recognition, sign language recognition, pattern recognition, computational linguistics, affective computing, assistive technologies, interpreted data processing, intelligent video analysis, computer vision, automatic machine learning, and multimedia systems.

Education

ITMO University — *St. Petersburg, Russia*

PhD in Engineering — *Sep. 2016 - Dec. 2020*

- Thesis: "Models and Methods for Automatic Recognition of Russian Sign Language Elements for Human-Machine Interaction", supervised by Prof. A. Karpov

Program Committees

2026	**Organizer & Program**, 28th International Conference on Speech and Computer (SPECOM)	*Ohrid, North Macedonia*
2025	**Organizer & Program**, 27th International Conference on Speech and Computer (SPECOM)	*Szeged, Hungary*
2024	**Organizer & Program**, 26th International Conference on Speech and Computer (SPECOM)	*Belgrade, Serbia*
2023	**Organizer & Program**, 25th International Conference on Speech and Computer (SPECOM)	*Hubli-Dharwad, India*

Skills

Speech & Audio Processing	Audiovisual Speech Recognition, Emotional Speech Analysis, Affective Computing
Sign & Gesture Recognition	Sign Language Recognition, Gesture-based Interfaces, Assistive Technologies
Computer Vision & Video Analytics	Object Detection, Visual Command Recognition, Intelligent Video Analytics
Machine Learning & Deep Learning	Neural Networks, Transformer-based Models, Automatic Machine Learning
Natural Language Processing	Computational Linguistics, Multimodal NLP, Interpreted Data Processing
Multimedia & Multimodal Systems	Multimodal Emotion Recognition, Multimodal Interfaces, Human-Robot Interaction
Applied AI Systems	Speech-Driven Exoskeletons, Driver Monitoring Systems, AI-based Medical Assistive Tools
